NOTES

¹The risk and performance data used for illustration in this monthly factsheet are calculated using a theoretical unit representative of the strategy. This unit bears 0.75% of management fees and is not subject to the Liquidity Risk Premium mechanism as described in the prospectus of the Sicav.

²Sharpe ratio is calculated using a risk-free rate in the appropriate currency over the period analyzed. The risk-free rate used for Sharpe ratio calculation is the Pictet Short Term Money Market EUR I.

³The drawdown is the percentage drop in the price of an investment from its last peak price. The worst drawdown represents the greatest peak to trough decline over the life of an investment.

⁴When 12 months of performance data is unavailable for a calendar year, partial year to date is shown.

⁵Each Class P shares will receive a Liquidity Risk Premium at the end of each month, only if the Gross Monthly Performance of the Sub-Fund is positive. This Liquidity Risk Premium comes from the portion of the Gross Monthly Performance normally attributable, pro-rata, to the Liquid Classes but not attributed to them, as explained in the prospectus in the description of Class A, Class C, Class F and Class G.

⁶The cost of the Liquidity Risk Premium for Liquid Classes cannot exceed 0,10% per month.
